

1.17.5 Release notes

Welcome to the uEducateUs 1.17.5 release.

The focus of this release was the inclusion of the **Fountas & Pinnell** Comprehension test into the **Task Analysis module**. The addition of this test has been requested by numerous schools, so we are happy to be able to provide it.

There have been numerous improvements to existing functionality included in this release. We are grateful for the feedback that we receive from our users, as this feedback continues to help drive the direction and content of our release cycles.

New Features

- Inclusion of the **Fountas & Pinnell** reading comprehension test

Improvements

Administrators:

- Improvements to the Cases21 staff importing so that all contact information is now imported and added to the staff members profile in uEducateUs.
- Added an **Attendance Maintenance** notification widget to the home page so that admins don't need to go to the Maintenance page to check for errors.
- The **Student arrivals and departures** functionality has been refactored for better useability.
- Columns have been added to the **People Management** page to provide additional information to help in the management of multi campus schools.
- The **Reset all login details** option was removed from the Cases21 Import page as it was not relevant to this page.
- The **Learning Objectives** option has been removed from school management as this function is now redundant.
- Updates to the **Revise parent-student access** page include text updates and component formatting for better useability.
- Improvements to the **Attendance Report** so classes outside of the date range of the report are no longer displayed.
- Updated the **Is main teacher** control in classes setup to change the checkbox back to a slider.

Teachers and Administrators:

- Updates to **Creating new tasks** means that multiple classes can now be assigned to a task.
- You can now **Separate test areas into graphs** for better reporting in task analysis.
- Improvements to the **Permission Slips landing page** for better useability.
- **Print Report** now opens in a new browser tab/window for better useability.
- **Permission Slip improvements** includes better logic in the form for improved useability.

All users:

- Improvements to the **Did You Know** home page widget means that the uEducateUs support team can keep users informed on additions and changes to system functionality.
- **Updates to the Home Page** include text and link changes for better useability.
- The **Go back to** button that is displayed when viewing a calendar event now remembers the previous state of the calendar for ease of navigation to and from the calendar events.
- Added a **Quick-link** to the **How-To documents** on the home page.
- Users now have an option to **show or hide the Class Timetable** in the diary calendar.

Issues

Administrators:

- Clicking on the notification that a student has had a new behaviour logged against them, no longer displays the **Page not found** error message.

All Users:

- Resolved an issue that caused tool tips to flicker on mouse over action, and to display incorrectly when they had a large amount of text in them.
