1.17.6 Release notes

Welcome to the uEducateUs 1.17.6 release.
The focus of this release was usability improvements to the Parent Teacher interviews and Reporting sections, as well as other various improvements and issue resolutions.

We encourage your feedback, as this feedback continues to help drive the direction and content of our release cycles.

Improvements

Administrators:

- Removed the **Task** tab from the **Modify Class** page. This was confusing as it was not a function related to modifying a class.
- Multi campus schools now have the ability to assign a different logo to each campus, rather than the same logo being used for all campuses.

Teachers and Administrators:

- **Parent / Teacher Interview improvements**: The usability around the setting of class and teacher availability along with making bookings and doing cancelations has been improved while setting up Parent Teacher interviews.
- The **Student Overview notes** have had the 500 character limitation removed.
- Added a **Preferred Name** box for Sample Comments within the **Reporting section**. This allows the use of a person's preferred name, rather than their first name.

Parents:
- **Parents can no longer book consecutive interviews with the same teacher**. Some schools were experiencing issues when the first interview ran past its designated time.
  This feature has been implemented to be an option that can be turned on or off by schools. This option is off by default (i.e.: by default, parents can book consecutive interviews with the same teacher).

Issues

Administrators and Teachers:
- Fixed an issue that was stopping users from selecting certain text point sizes within the **Manage Attendance Comments** section.
- Fixed an issue that was causing the **Task Result Summaries** to show inconsistent values in the **Received** and **Average** marks sections.
