

1.24 Release notes

Welcome to the uEducateUs 1.24 release.

The release notes have been set up to allow the different user types to easily find the issues that are relevant to them. *For example, if you are a parent, you only need to look in the **Parents** category to find all issues that affect you.*

The focus of this release was:

- Upgrades and improvements to the uEducateUs Kiosk and the Permission Slips.
- The implementation of a new Notification/Alert system for Admin users to raise awareness of, and make it easier to rectify alerts in relation to:
 - Overdue and Partially Marked attendance rolls
 - Parent-student Access Alerts that require revision
 - Outstanding Attendance Maintenance requirements
 - ...other alerts to be added in the future

Clicking on an alert in the list will take you to more information about that alert.

The alerts will remain visible until the reason for the alert has been resolved. If you need any help in resolving an alert, call the support team on 1300 833 500 or [raise a support ticket](#).

- The functionality within the Student Notes has been greatly improved for Admins and Teachers.

We encourage your feedback, as this feedback continues to help drive the direction and content of our release cycles.
