

# 1.26 Release notes

## Welcome to the uEducateUs 1.26 release.

The release notes have been set up to allow the different user types to easily find the issues that are relevant to them. *For example, if you are a parent, you only need to look in the **Parents** category to find all issues that affect you.*

The focus of this release was:

- The introduction of a comprehensive **Case Notes** module within the uEducateUs system.
  - The new Case Notes module allows schools to easily record and track on-going student checks, assessments, interventions etc. Features include the following:
    - The ability to restrict which Admins and Teachers are able to view and create certain Case Note Categories.
    - The ability to add Sub-categories to Case Note Categories, to allow more flexible note recording and retrieval.
    - Case Notes can be linked to one another, allowing for clear on-going tracking of certain student issues.
    - A customisable Summary Report that lists the students who have Case Notes recorded against them.
- The **default Attendance Codes** have been updated to comply with the Department Of Education (D.O.E.) 2020 requirements.
- Various other improvements and issue resolutions.

We encourage your feedback, as this feedback continues to help drive the direction and content of our release cycles.
